

ALCOHOL AVAILABILITY IN ONTARIO

THE CHANGING LANDSCAPE

Ontario is experiencing a substantial **INCREASE** in the overall availability of alcohol.

Increased availability makes it easier to buy alcohol, including for someone who is:

- intoxicated
- underage, or
- has an alcohol use disorder.

Alcohol availability has increased **22%** between 2007 and 2017.

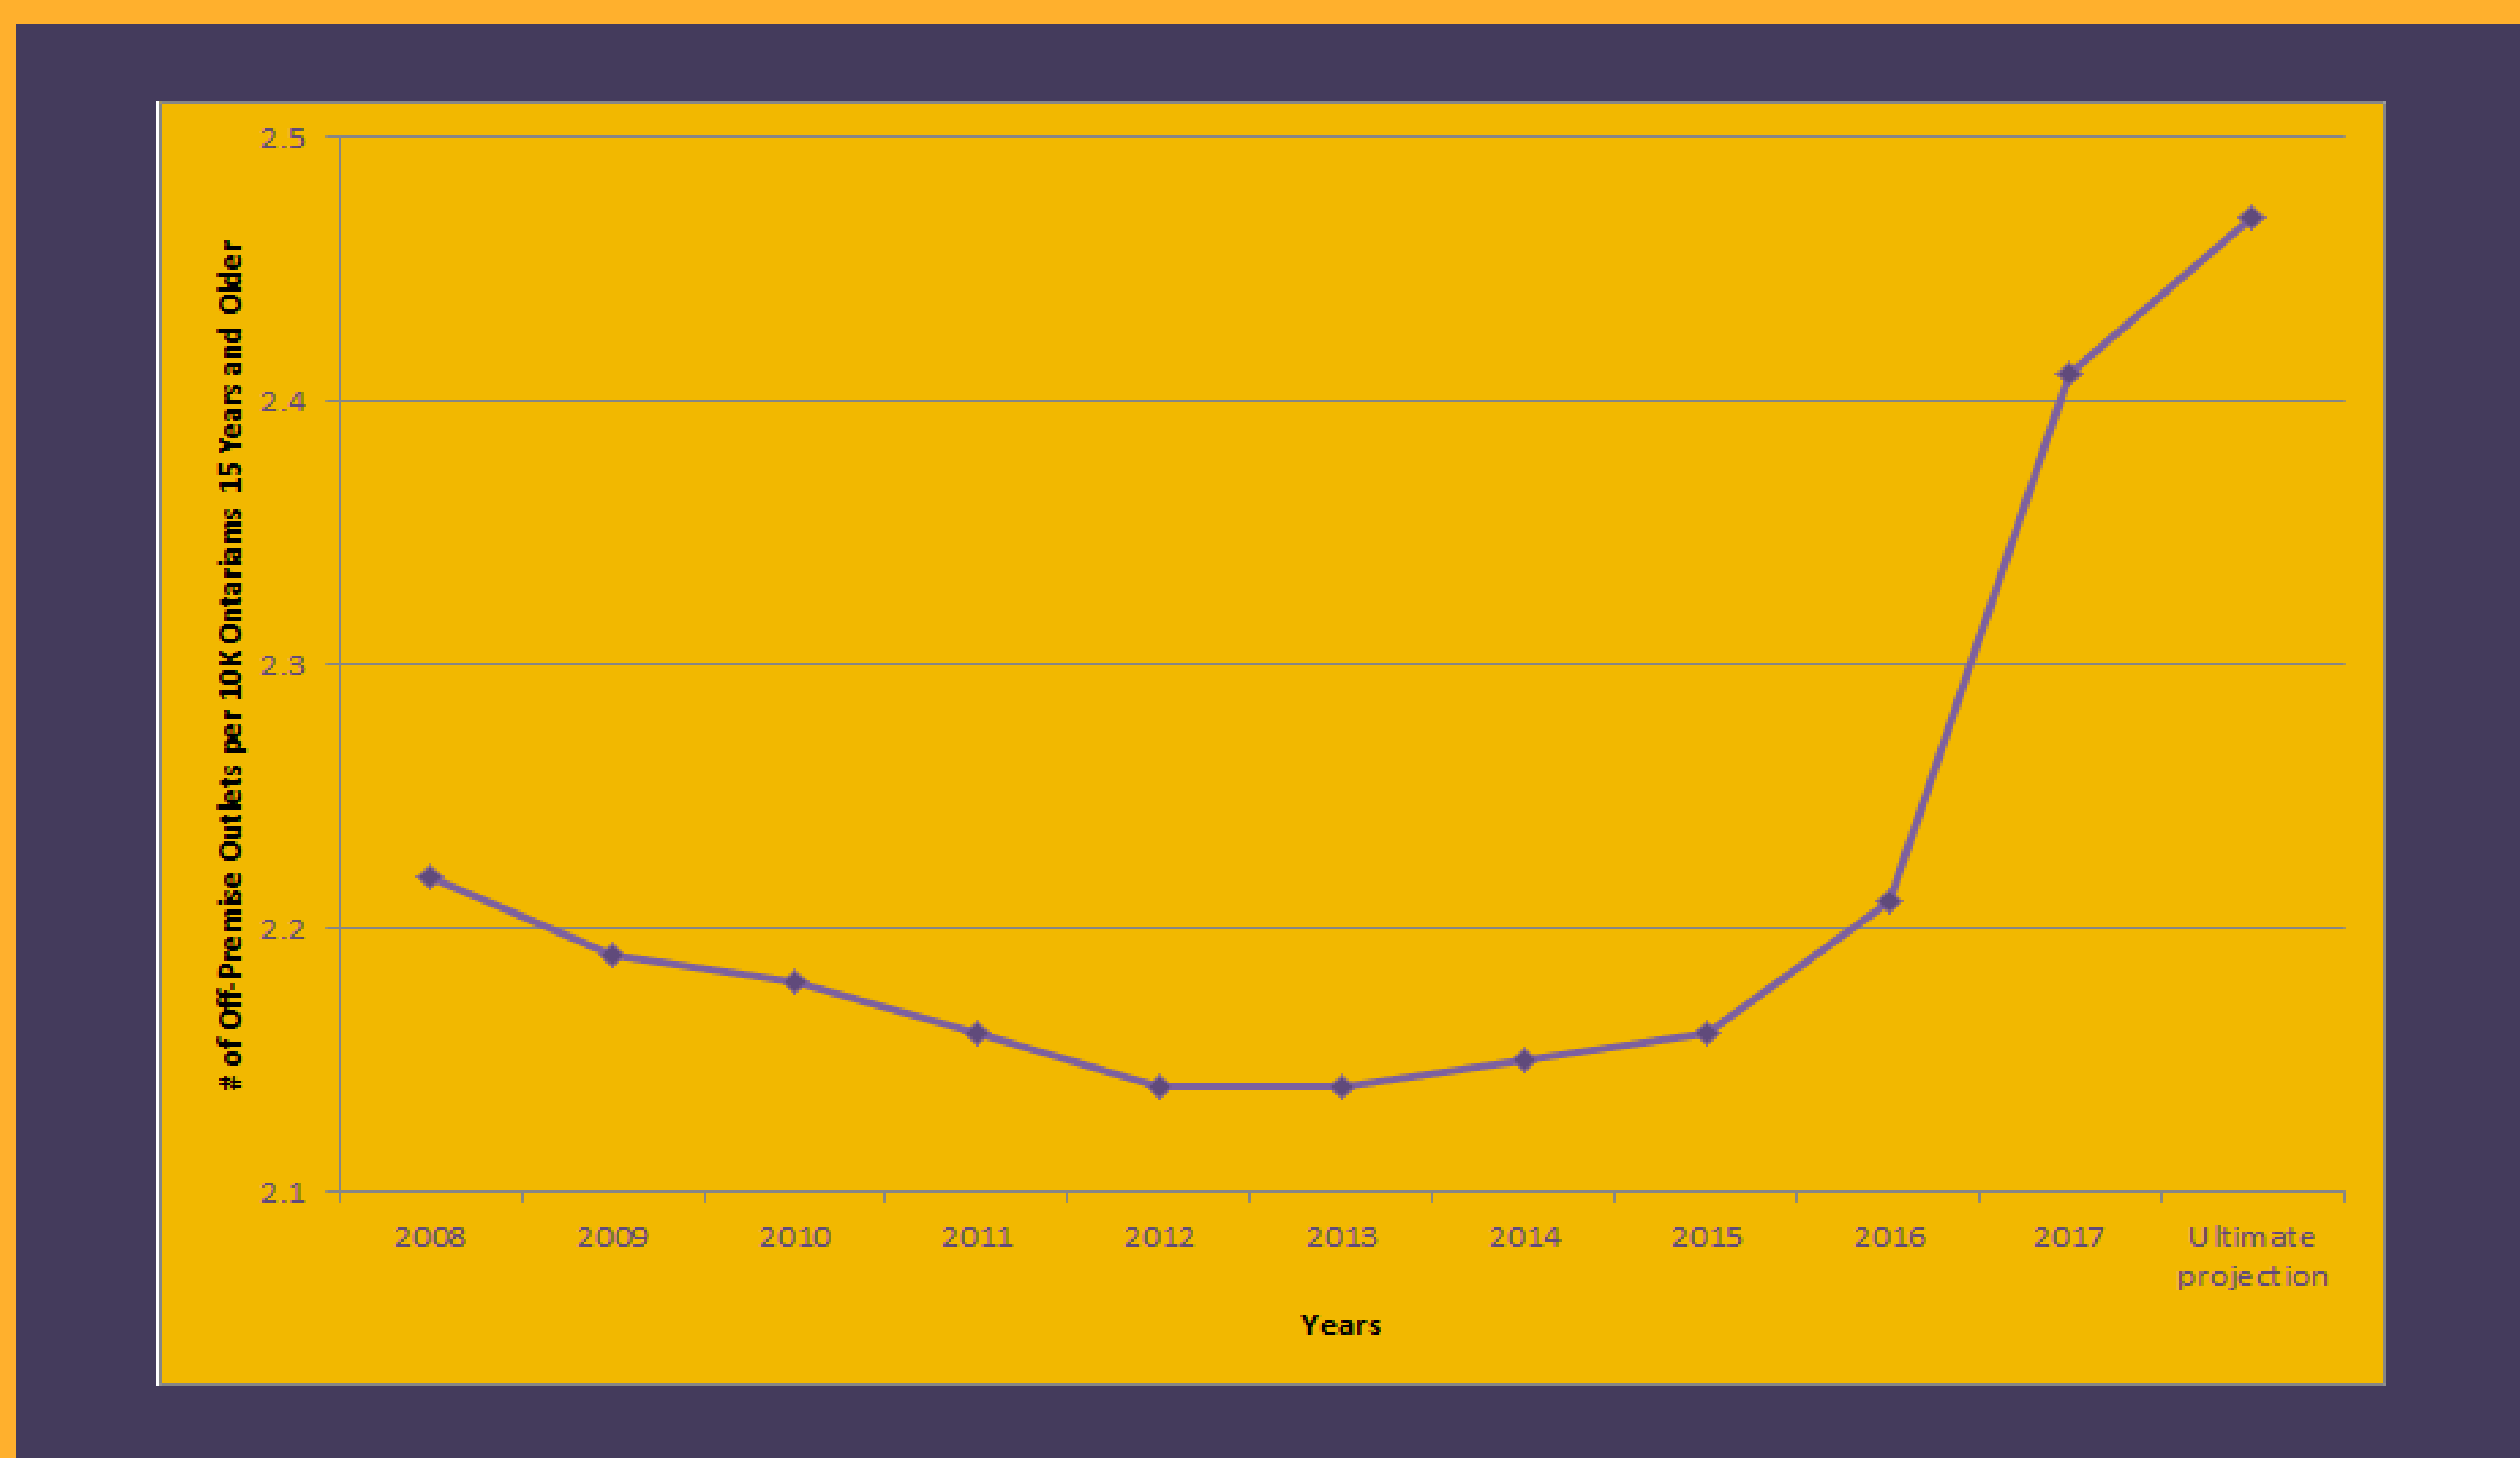

Ontario has committed to making wine, beer and cider available in up to 450 grocery stores.

Expansion of private sales and outlets leads to greater pressure on government to further expand the availability of alcohol (e.g. farmers' markets and grocery stores).

TOTAL NUMBER OF *OFF-PREMISE OUTLETS PER 10K ONTARIANS 15 YEARS AND OLDER

*Off-premise outlets include: LCBO and Agency stores, Beer Stores, Ontario wine stores, Grocery stores, On-site brewery and distillery stores, ferment on premise outlets, and Duty-free stores.

DID YOU KNOW?

Increased Alcohol Availability

Increased Alcohol Consumption

Increased Alcohol Harms and Costs

Alcohol is associated with: dependence, chronic diseases, violence, injuries and social problems.

In 2015, **15%** of Ontario adults reported harmful drinking behaviours.

Alcohol-related costs in Ontario amount to at least **\$5.3** billion annually.

Low-moderate alcohol consumption can cause damage to the brain.

1 in 3 Ontarians experienced harm as a result of someone else's drinking in the past year.

Alcohol causes various cancers, including:

- Mouth
- Esophagus
- Throat
- Colon and Rectum
- Voice Box
- Breast
- Liver

WHAT YOU CAN DO TO REDUCE THE IMPACT OF INCREASED ALCOHOL AVAILABILITY

Raise awareness about the impact of increased alcohol availability on community health and wellbeing.

Prioritize local surveillance by:

- Identifying indicators
- Partnering with stakeholders
- Collecting data
- Reporting to the community

Build stakeholder support to prevent the expansion of private sales and outlets.

Champion policy change on alcohol outlet density and hours of sale.

Educate local leaders on evidence-based strategies and **support municipal alcohol policies** to reduce access.

Support government action to develop a comprehensive, evidence-based alcohol strategy.
